to redistrictingcommittee

Hi Redistricting committee,

I think that the communities especially in the city should be grouped together and not split up in having more than 1 representative. For example, keep large Hispanic, Asian, Black communities together, so they can advocate to their representative in a block. This will help each ethnic community feel united and give them a voice. There might be other communities such as the LGBTQ that should be kept together.

I think that redistricting should be based on census population of areas and keeping areas fairly equal to one another and not drawing weird lines around areas because that is where the Democrats live.

Though I like the Democrat super majority, I think we should be fair as possible. I am however grateful for the many hard to pass laws that HAVE been passed like closing the 3 immigration centers/jails in IL and passing NO Money Bond. That was a big one!
